

ZetiRover

Portable repeater for commercial vehicles and machinery

**Better connectivity
on and off farm**

Feature Summary

Multi-carrier 3G, 4G and Wi-Fi for best in class connectivity

Make and receive calls using Wi-Fi calling ¹

Wi-Fi connectivity for internet, messaging and email

Get more out of your machine's existing technology*

- Remote telematics
- Remote support
- Screen to cloud data transfers

Compatible with Zetifi's range of ruggedised Farm Wide Wi-Fi solutions for connectivity everywhere you need it

Magnetic quick mount means the ZetiRover installs in seconds and can be moved between vehicles and machinery easily

Connection awaits.

The ZetiRover is a vehicle repeater for people in rural and remote locations who need connectivity for Wi-Fi calling, messaging, email and internet access.

Seamless handover between multi-carrier 3G, 4G and Wi-Fi networks means you can be connected, productive and safe in more places than ever before.

With quick mount installation on your machinery, the ZetiRover provides the connectivity your operators need while unleashing your machine's telematics, remote support and data transfer capabilities.*

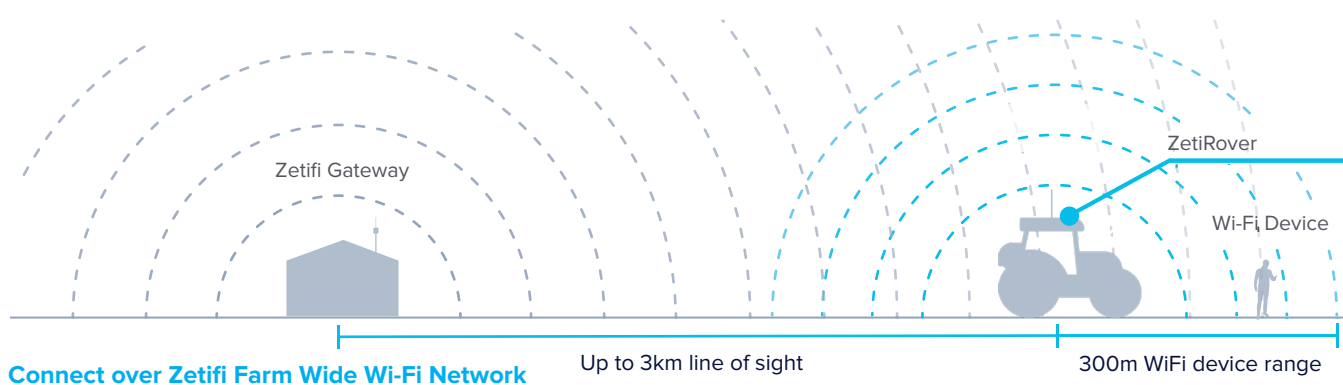

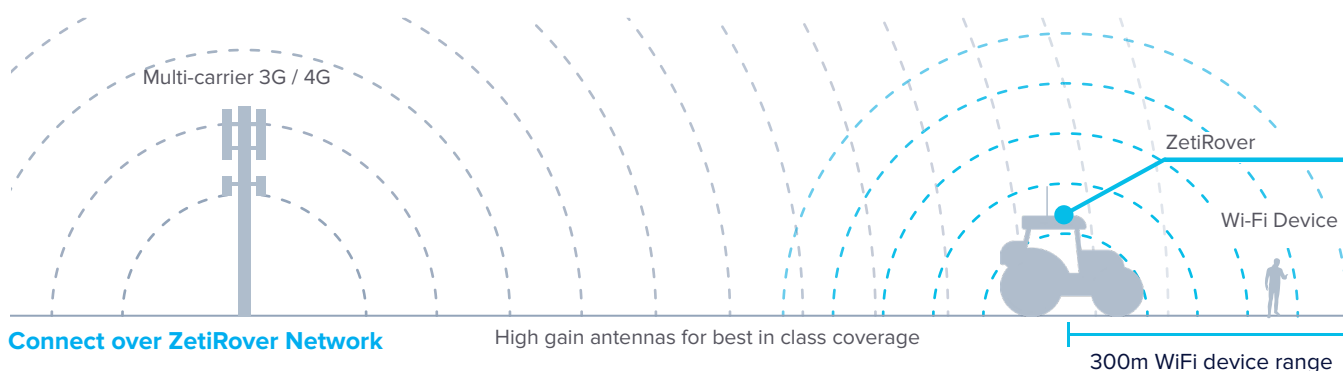

"I can't believe what a difference this is making to our operations. A working phone isn't a luxury - it's a must have for all businesses, especially farms."

Cameron Ferrier, Birchip, Victoria

Connection options

In the box

Quantity	Description
1	ZetiRover
1	Fused Car Accessory (Cigarette Lighter) power adapter
1	Power Supply 24VDC 1200mA
1	Security Tether
1	ZetiRover User Guide

Diagrams are not to scale. Network conditions and environmental factors, including location of antenna, volume of network traffic, building materials and construction, line of sight, and network overhead, can affect connectivity. Environmental factors may adversely affect wireless signal range.

Guarantees

All Zetifi hardware includes a 3 year warranty. In addition to all your legal warranty entitlements we are happy to provide you with a 30 day no questions asked refund on your ZetiRover if it just isn't the right solution for you. Terms and conditions apply, see zetifi.com/terms for details.

ZetiRover Specifications

General	
Dimensions	540mm (L) x 125mm (W) x 60mm (H)
Antenna Height	760mm
Weight	Approx. 4.0kg
Operating temperature	-35°C to 70°C
Enclosure construction	Anodised aluminium
Operation cycle time	24 hours (rated for continuous use)
Power	
Voltage range	11V-32V DC
Maximum current draw	24W
Power connector	11V-32V DC, Max 24W

Specifications are subject to change without notice.

Wi-Fi Calling and Wi-Fi SMS

Wi-Fi Calling enables you to make and receive voice calls even when you can't connect to the mobile network. Your mobile simply uses your Zetifi Wi-Fi network instead of the mobile network, letting you make and receive calls as you normally would.

Your Wi-Fi calls are charged by your phone provider at the standard rate.

The Wi-Fi network created by ZetiRover is suitable for Wi-Fi calling using a Telstra SIM and phone including Apple iPhone 6 onwards, Samsung Galaxy S7 onwards, Note 5 onwards, Google Pixel 2 devices onwards and LG G6 onwards.

It is now also possible to use Wi-Fi SMS to send and receive SMS messages on compatible devices through a Wi-Fi network. At the moment Telstra support Wi-Fi SMS on Apple iPhones 6S and later and Samsung Galaxy S9 and later. Support for other devices is expected soon.

Optus support Wi-Fi calling and Wi-Fi SMS on post paid plans and phones from Optus including Apple iPhone 6 onwards, Samsung Galaxy S7 onwards, Note 5 onwards, Google Pixel 3 devices onwards.

Accessories

Mounting kits and adapter cables	
ZMACMCS11A	Case IH / New Holland mounting kit and adapter cable
ZMACMJD11A	John Deere mounting kit and adapter cable
ZMACMCL11A	Claas mounting kit and adapter cable
ZMACMCT11A	Caterpillar mounting kit and adapter cable
ZMACMCU11A	Custom mounting kit and adapter cable

Zetifi Farm Wide Wi-Fi products	
ZGAT2M1A	Zetifi Wi-Fi / LTE Gateway suitable for installation on top of sheds, silos or masts
ZGAT2S1A	Zetifi Wi-Fi / LTE Gateway suitable for installation on top of sheds, silos or masts (solar powered)
ZGAT1M1A	Zetifi Wi-Fi Gateway suitable for installation on top of sheds, silos or masts
ZGAT1S1A	Zetifi Wi-Fi Gateway suitable for installation on top of sheds, silos or masts (solar powered)
ZACP4M1A	ZetiAP ruggedised wireless access point for extending Wi-Fi connectivity into sheds, yards & houses

The Zetifi Network

Coverage

Off Farm - Multi-carrier Advantage

Roam seamlessly between Australia's two largest mobile networks with combined coverage from the ZetiRover's dual high gain 3G/4G antennas - ensuring you will always have the best available coverage for Wi-Fi calling and internet access everywhere you go.

On Farm - Fill the Gaps that Boosters Can't

The ZetiRover was designed with on farm connectivity in mind from the start. Boosters and repeaters are suitable for improving coverage for voice in areas where there is unreliable signal strength. However the simple fact is that many Australian farms don't have enough coverage to boost in the first place. Most farms have many black spots where a booster or repeater simply cannot get enough signal to work reliably. ZetiRover can work with a private Wi-Fi network to fill in mobile blackspots anywhere you need coverage using Zetifi's range of Farm Wide Wi-Fi products.

Speeds

The Zetifi Rover Network is optimised for reliable and stable connectivity across the widest possible areas. It is perfect for voice calls using WiFi calling and basic web browsing. The target bitrate across the Zetifi Rover Network is 1-5 mbp/s, which is ideal for phone calls, browsing the web, using Twitter, Facebook, web based software, email and other medium bandwidth applications. If you need faster speeds and lower cost data for bandwidth intensive applications like Netflix, we can help you build a Farm Wide WiFi network connected to your preferred ISP.

Monthly Subscription

Access to the Zetifi Network requires an active subscription to the Zetifi network charged at \$30 per month + \$10/GB for data. For terms and conditions refer to zetifi.com/terms/

Subscription also includes all support, monitoring, maintenance and software upgrades. Data charges are for data used on the Zetifi Network. We don't charge you for using your own data (e.g. SkyMuster) over your Zetifi WiFi network.
